**H**ave a good sound, box design must be reasonable, Better quality speaker unit.

The K series compact narrow coverage loudspeaker provides high power output, low distortion, and consistent polar response in a compact enclosure.

We have had many years of production speaker technology, whether it is sub-woofer or compression driver, We can produce the highest quality products.

Yes, we have a very good packaging to protect even if it is exported to Asia do not have any problem.

## K SERIES

**W**e continue to explore, Continuing to pursue, Today, at long last comes up with a conventional K series. Professionals at all levels should reflect, We do not pursue the surface, Our pursuit of the real good sound system. To facilitate the installation of the project design, Professional sound processing capability, To create different CSP.

### LV2II LOW FREQUENCY DRIVERS

Csp's Special Drive low frequency drivers dramatically reduce driver Temperature while greatly enhancing all critical performance parameters: extended frequency response, high power output, and low distortion.

### MHF750™ constant Q horn

Ensuring excellent coverage and pattern control. K Series systems include Csp's MHF750™ constant Q horn, providing 70 x 50 patterns with exceptionally low distortion and smooth response.

### H452i High Frequency Compression Driver

Refining our innovative compression driver technology specifically for the K Series, our engineers designed the new Lv2ii with a titanium damped diaphragm driver. This next-generation device delivers crystal-clear sound with superb dynamic range.

We introduce the K Series as our introductory line of speakers. The K Series uses 375 watt woofers and 1" titanium drivers. Two full range(K1,K2) and two sub woofer(RS50,RS60) cabinets gives the K Series an excellent quality and a affordable choice. As a starter DJ rig or as a cost effective small sound reinforcement system, the K Series pounds out the music without missing a single beat every night of the week.

CSP Professional was conceived in 1992. It was then called Paul Audio Inc. Now Paul Audio Inc. is the parent company of CSP Professional. Like many companies, CSP has evolved over time and is the leading Exporter to Asia and the Pacific Rim. With over 250 dealers world wide, CSP has a solid customer base that is expanding rapidly. The company's first manufacturing plant was

in The City of Industry, CA. we then relocated to beautiful Montclair, CA, and now house all operations at the Montclair complex.

Today we manufacture every component and parts. From the assembly of all speakers and hi frequency drivers, to cutting out all the cabinets on our CNC saws, to spraying every cabinet with our own U.P.W.E. 2-part high temperature exterior treatment with built-in UV protestant, to shearing all our grills and building all of our own crossovers and then completing the final assembly. Our quality control is strict and efficient and we have yet to receive a returned product. This is why we offer the longest warranty in the business. FIVE YEARS! No questions asked.
